

# Sideswipe® Pro Herbicide Applicator

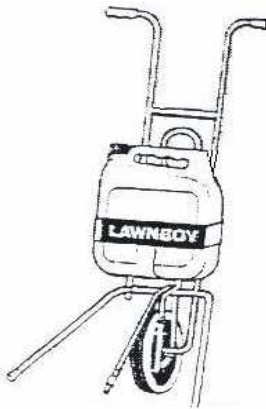

Designed to precisely and selectively apply the correct amount of herbicide, the Sideswipe Pro features a wipe-on nylon applicator pad that wets evenly for effective distribution and application with no drift or overspray. A protective shield over the top of the applicator pad allows you to safely apply herbicide even around desirable plants and shrubs. The reservoir handle features a 32 oz. (1 litre) capacity. Coverage Area: 1,800 sq. ft. Pad Length: 9". Handle Length: 52".

Ref.No.	Model	List Price
SWP100	Sideswipe Pro, Complete w/Shield (1 Litre. capacity)	\$60.00

## Lawnboy Sprayer

The Lawnboy is based on an electro galvanized steel frame. A 10 Litre plastic spray tank, a simple wheel operated spray pump and floodjet nozzle, which gives a 610mm sprayed swath. Pump output varies with speed so that the same application rate is obtained at any reasonable steady walking speed. The lawnboy applies 3 litres per 100 square meters as a single pass, but double application is recommended for even spray coverage - .62/100 square meters. To do this use a half overlap system by moving the wheel over 300mm for each parallel pass. A 10 Litre fill should treat 151 square meters as a double application.
